SUMMARY

Full Stack Web Developer with around 8 years of professional experience in PHP, Laravel, WordPress, Wix, Shopify, CodeIgniter, MySQL, JavaScript, jQuery, AJAX, Composer, Git, and API integration. Skilled in building e-commerce websites, company profiles, admin dashboards, payment gateway integrations, and ERP systems. Most recently developed Laravel-based platforms, API data synchronization, a Flutter WebView application, and a car sales ERP system at Optimus Auto Trading PTE. LTD.

EXPERIENCE

Optimus Auto Trading PTE. LTD *Full-Stack Web Developer*

Batam. Work from Office Batam
June 2025- June 2026

- Revamped and maintained WordPress and Laravel websites for Singapore and Zambia branches, including building and customizing responsive pages with Elementor, managing plugins, resolving technical issues, and optimizing website performance.
- Built a Laravel-based automotive e-commerce platform with vehicle catalogs, product listings, inquiry features, and sales support tools.
- Developed APIs and cron jobs to synchronize vehicle data between Singapore and Zambia branches.
- Developed a Flutter WebView application and Laravel-based ERP system for showroom catalogs, inventory, leads, deals, customer payments, and financial reporting.
- Used ChatGPT and AI-assisted development tools for debugging, code improvement, and technical research, followed by manual testing and validation.
- Developed and customized WordPress plugins, including a custom product-listing plugin built for internal business requirements, and created responsive page layouts based on design specifications.
- Managed hosting, including cPanel, NGINX, DNS, SSL certificates, backups, and performance optimization.

Key Achievements

- Reduced manual vehicle data updates by approximately **50%** through API integration and cron job automation.
- Delivered multiple digital solutions, including WordPress websites, an e-commerce platform, a Flutter WebView application, and a custom ERP system.
- Centralized showroom sales and operational processes through integrated inventory, customer, payment, and reporting features.

Neu Entity PTE. LTD.

Singapore. Remote from Batam

Web Developer

June 2021- June 2025

- Designed and developed responsive landing pages for Neu Entity using modern web design practices, improving online brand visibility and user accessibility.
- Analyzed website traffic, clicks, and page views using Google Analytics and Google Search Console, providing performance insights to support website optimization and digital strategy.
- Built and customized responsive company profile, personal branding, and e-commerce websites based on client requirements and design mockups using WordPress, WooCommerce, HTML, CSS, JavaScript, and page builders including Elementor, Divi, Oxygen Builder, WPBakery, and Beaver Builder, as well as Wix and Shopify.
- Customized WordPress-based systems, including a wedding system, by developing tailored features to meet client requirements and improve user experience.
- Developed work order portals using wix, bursary dashboard systems, and payment gateway integrations using Wix Velo, MCPayment, Red Dot Payment, and HitPay APIs, reducing manual operational processes by an estimated 40%.
- Developed custom WordPress page templates, custom post types, taxonomies, and reusable content structures using PHP, Advanced Custom Fields (ACF), JavaScript, and CSS.
- Implemented SMTP configuration, technical SEO, redirects, XML sitemaps, robots.txt.
- Migrated and maintained client websites across WordPress, Wix, and Shopify, including plugin updates, troubleshooting, security checks, and speed optimization.
- Managed hosting environments, including cPanel, NGINX, DNS, SSL certificates, Cloudflare configuration, website migration, backups, and performance optimization.
- Communicated directly with international clients to gather requirements, explain technical limitations, provide project updates, and recommend practical solutions.

Key Achievements

1. Delivered 20+ client web projects across landing pages, company profiles, personal branding websites, e-commerce platforms, dashboards, and custom WordPress systems.
2. Improved website performance tracking and reporting by implementing Google Analytics and Google Search Console insights for traffic, click, and page view analysis.
3. Reduced manual payment and operational workflows by approximately 40% through payment gateway API integration, work order portal development, and dashboard automation.

PT. Asta Satria Investama

PHP Developer

Batam. Work from Office Batam

May 2018- March 2021

- Built and customized company profile websites using WordPress, improving business online presence and supporting digital branding needs.
- Developed a Laravel-based Admin Management Game Web Application using JavaScript,

jQuery, and AJAX, including core modules, requested features, and backend functionality to support internal game management operations.

- Created API functionality for uploading game data and images to the server, improving data submission efficiency and reducing manual upload processes by an estimated 40%.
- Managed database operations using PHP, Laravel, and MySQL by creating, editing, updating, and deleting application data to support accurate and reliable system performance.
- Collaborated with developers using Git and reported project progress through Scrum Agile workflows in Jira Atlassian, improving task tracking, team coordination, and delivery visibility.

Key Achievements

1. Delivered a Laravel-based Admin Management Game System that supported internal game data, image uploads, feature updates, and backend management workflows.
2. Improved data handling efficiency by approximately 40% through API development, MySQL database management, XML data generation, and AWS S3 integration.
3. Strengthened team collaboration and project transparency by applying Git version control, Jira Atlassian reporting, and Scrum Agile practices throughout the development lifecycle.

PT. Excelitas Technologies Batam **IT Center Intern**

Batam. Work from Office Batam
Jan 2016- Apr 2016

- Installed and configured desktop software applications across company computers, supporting daily employee productivity and reducing basic application setup issues.
- Installed and maintained Windows operating systems on company laptops and desktops, ensuring devices were ready for operational use.
- Developed a computer inventory input system using VBA in Microsoft Excel, improving hardware data recording and asset tracking efficiency.
- Created a training attendance system using VBA in Microsoft Excel, helping automate attendance recording and reduce manual data entry work.
- Provided basic IT support for software, operating system, and user device issues, improving response time for daily technical problems.

Key Achievements

1. Improved IT asset tracking by creating a VBA-based computer inventory system in Microsoft Excel.
2. Reduced manual attendance recording by developing a VBA-based training attendance system.
3. Supported smooth daily IT operations by assisting with software installation, Windows OS setup, and basic technical troubleshooting during the internship period.

EDUCATION

Universitas International Batam

Bachelor Degree - GPA 3.61

2017 - 2021

Skill

- **Backend Development:** PHP, Laravel, CodeIgniter, REST API, CRUD Operations, Cron Job Automation, AWS S3 Integration
