SUMMARY

Full Stack Web Developer with around 8 years of professional experience in PHP, Laravel, WordPress, Wix, Shopify, CodeIgniter, MySQL, JavaScript, jQuery, Git, and API integration. Skilled in building e-commerce websites, company profiles, admin dashboards, payment gateway integrations, and ERP systems. Most recently developed Laravel-based platforms, API data synchronization, a Flutter WebView application, and a car sales ERP system at Optimus Auto Trading PTE. LTD.

EXPERIENCE

Optimus Auto Trading PTE. LTD ***Web Developer Cum IT Support***

Batam. Work from Office Batam
June 2025- June 2026

- Revamped and maintained Laravel-based company websites for Singapore and Zambia branches, improving website structure, performance, and accessibility across international automotive markets.
- Built an e-commerce car platform for the Zambia branch using Laravel, including vehicle catalog, product listings, and sales support features to improve international sales performance.
- Developed API endpoints and cron jobs to synchronize real-time car data from Singapore to Zambia, reducing manual data updates and improving data accuracy across branches.
- Built a Flutter WebView application integrated with a Laravel backend for the Kingsman showroom, supporting showroom catalog access, customer membership features, purchased vehicle information, and car service information.
- Developed a custom ERP system for Kingsman to support car sales operations, including vehicle inventory management, vehicle location tracking, lead and deal management, customer payment processing, customer car budget reporting, and financial reporting.
- Provided IT support and troubleshooting for printers, NAS server, laptops, internet connectivity, and desktop software application errors to maintain smooth daily business operations.

Key Achievements

1. Delivered multiple digital solutions for automotive business operations, including Laravel-based company websites, an e-commerce car platform, a Flutter WebView showroom application, and a custom ERP system for Kingsman.
2. Reduced manual data management by approximately 50% through API endpoint development, cron job automation, and real-time vehicle data synchronization between Singapore and Zambia branches.
3. Improved customer and showroom accessibility by developing a Flutter WebView application integrated with Laravel, enabling users to access showroom catalogs,

- membership features, purchased vehicle information, and car service information.
4. Centralized car sales operations by building ERP features for vehicle inventory, vehicle location tracking, leads, deals, customer payments, car budget reporting, and financial reporting.
 5. Supported smooth daily business operations by providing IT troubleshooting for printers, NAS server, laptops, internet connectivity, and desktop software application issues.

Neu Entity PTE. LTD.

Web Developer

Singapore. Remote from Batam

June 2021- June 2025

- Designed and developed responsive landing pages for Neu Entity using modern web design practices, improving online brand visibility and user accessibility.
- Analyzed website traffic, clicks, and page views using Google Analytics and Google Search Console, providing performance insights to support website optimization and digital strategy.
- Built company profile, personal branding, and e-commerce websites for clients using WordPress, Wix, and Shopify, improving client digital presence and online sales capability.
- Customized WordPress-based systems, including a wedding system, by developing tailored features to meet client requirements and improve user experience.
- Developed work order portals, bursary dashboard systems, and payment gateway integrations using Wix Velo, MCPayment, Red Dot Payment, and HitPay APIs, reducing manual operational processes by an estimated 40%.

Key Achievements

1. Delivered 20+ client web projects across landing pages, company profiles, personal branding websites, e-commerce platforms, dashboards, and custom WordPress systems.
2. Improved website performance tracking and reporting by implementing Google Analytics and Google Search Console insights for traffic, click, and page view analysis.
3. Reduced manual payment and operational workflows by approximately 40% through payment gateway API integration, work order portal development, and dashboard automation.

PT. Asta Satria Investama

PHP Developer

Batam. Work from Office Batam

May 2018- March 2021

- Built and customized company profile websites using WordPress, improving business online presence and supporting digital branding needs.
- Developed a Laravel-based Admin Management Game Web Application by creating core modules, requested features, and backend functionality to support internal game

management operations.

- Created API functionality for uploading game data and images to the server, improving data submission efficiency and reducing manual upload processes by an estimated 40%.
- Managed database operations using PHP, Laravel, and MySQL by creating, editing, updating, and deleting application data to support accurate and reliable system performance.
- Collaborated with developers using Git and reported project progress through Scrum Agile workflows in Jira Atlassian, improving task tracking, team coordination, and delivery visibility.

Key Achievements

1. Delivered a Laravel-based Admin Management Game System that supported internal game data, image uploads, feature updates, and backend management workflows.
2. Improved data handling efficiency by approximately 40% through API development, MySQL database management, XML data generation, and AWS S3 integration.
3. Strengthened team collaboration and project transparency by applying Git version control, Jira Atlassian reporting, and Scrum Agile practices throughout the development lifecycle.

PT. Excelitas Technologies Batam IT Center Intern

Batam. Work from Office Batam
Jan 2016- Apr 2016

- Installed and configured desktop software applications across company computers, supporting daily employee productivity and reducing basic application setup issues.
- Installed and maintained Windows operating systems on company laptops and desktops, ensuring devices were ready for operational use.
- Developed a computer inventory input system using VBA in Microsoft Excel, improving hardware data recording and asset tracking efficiency.
- Created a training attendance system using VBA in Microsoft Excel, helping automate attendance recording and reduce manual data entry work.
- Provided basic IT support for software, operating system, and user device issues, improving response time for daily technical problems.

Key Achievements

1. Improved IT asset tracking by creating a VBA-based computer inventory system in Microsoft Excel.
2. Reduced manual attendance recording by developing a VBA-based training attendance system.
3. Supported smooth daily IT operations by assisting with software installation, Windows OS setup, and basic technical troubleshooting during the internship period.
